

Tips from the PGA Professionals.

The direction in which you aim your feet has very little bearing on where you swing the golf club and in what direction you hit your golf ball.

It is far more important to make sure your shoulders are aiming at your target. The only part of your body that can control the club are your hands, and these are attached to your shoulders.

Still having directional issues?

then pop in to the pro shop or
please call 01280 850005 and book a lesson.
